SMT SCANDINAVIAN MARINE TIME

- Exclusive design, case of anodic treated aluminium profile with smoothed corners. Also available with case in gold, champagne, red or blue finish.
- Excellent readability, 60 mm. high characters (seconds 45 mm.) viewable at distances up to 25 metres.
- One unit - two operation methods (stand-alone or as slave clock).
- Day and month in different languages
- Easy to set, three buttons.

Figures/characters available with a choice of red (standard) or green (optional) LEDs.

Operation methods

Connection to 220 V AC and optional for operation as a stand-alone unit (quartz crystal) or as slave clock. The operation method is selected via a dipswitch.

Options

- Temperature Display
- Chronometer
- Radio receiver
- Serial RS 232 C-input
- Serial BCD-input
- IRIG-B
